**PSYCHIATRY RESIDENCY –  
ANDERSON**

All the great names in health care started with a singular focus and goal – to heal. Our mission has been the same since our inception more than 143 years ago and continues today throughout our large network of hospitals, physician practices, urgent care centers and clinics.

But we know healing alone is not enough. We must learn, we must educate, we must push the boundaries of science and modern medicine. It is our duty and responsibility to ensure that the future of medicine continues to prosper. At St. Luke's, our commitment to education, research and innovation stands in no one's shadow.

We encourage you to learn more about **St. Luke's Graduate Medical Education** residency and fellowship programs. We seek only the best and brightest minds – those who want to be challenged and rewarded, inspired and involved. Take a look at what we have to offer.

## St. Luke's By The Numbers

**10**  
**Hospitals**

Serving nine counties throughout eastern Pennsylvania and western New Jersey, St. Luke's largest facility, St. Luke's University Hospital – Bethlehem, admits more than 25,000 people annually and features an Adult Level 1 Trauma Center.

**72,000**  
**Annual Admissions**

A leader in superior technology, St. Luke's is proud to be a General Electric Healthcare Global Show Site.

**14,000+**  
**Employees**  
The region's second largest employer.

**1,400+**  
**Physicians**  
Representing more than 100 specialties: 96% board-certified.

**1,600+**  
**Volunteers**

**300+**  
**Outpatient Facilities**

An exceptional commitment to the advancement of medical education has been a core St. Luke's focus since its inception in 1872.

**279,000+**  
**Annual Emergency Room Visits**

St. Luke's is one of only 400 members of the prestigious Council of Teaching Hospitals and in partnership with the Lewis Katz School of Medicine at Temple University, offers the region's only medical school campus.

**3,800**  
**Annual Births**

## Temple/St. Luke's School of Medicine

120 medical students study at St. Luke's annually and many select to continue their training at St. Luke's. Residents have the opportunity to interact, and instruct medical students as part of the collaborative learning process.

"Attending school at St. Luke's is an enriching experience. Students are expected to work hard, and most importantly, serve. We work in a high-volume hospital with an extremely diverse patient population. The community has embraced our presence and we are heavily involved in patient care. With a smaller student body, we are able to make an immediate impact on the community. Through various service projects and clinic opportunities, we become heavily invested in our patient population."

– Colin Caverly, MD, Class of 2016 and St. Luke's Emergency Medicine Resident

### Did You Know?

St. Luke's is also home to the nation's oldest operating nursing school.

## Network Quality Awards

At St. Luke's, our vision is to lead the region in clinical quality and safety performance. St. Luke's has been honored with more than 120 health care quality awards including, but not limited to:

on Key Quality Measures

Centers for Medicare and Medicaid Services  
(CMS) Hospital Compare Ratings – 4 Stars

American Heart/Stroke Association –  
Stroke Gold Plus Honor Roll Elite

National Committee for Quality Assurance –  
Patient-Centered Medical Home

## St. Luke's Psychiatry Residency – Anderson Campus

Our program provides a structured four year clinical educational experience to prepare residents to practice as independent psychiatrists. Some of the program highlights include:

- Diversity in faculty and their experiences coupled with diversity in clinical settings and the curriculum. Our faculty and attendings have strength and expertise in various fields of Psychiatry from Child and Adolescent to geriatric, consultation liaison and electroconvulsive therapy, psychopharmacology and psychotherapy including psycho dynamic psychotherapy.
- Our goal is for our graduates to be able to practice independently in any specialty, in the community or in academia. They will be equipped to provide evidenced based psychiatric care for a long and prosperous career.
- Exposure to EAC, ECT, telepsychiatry, and an affiliation as a clinical campus of the Lewis Katz School of Medicine at Temple University.

As a resident, you will be exposed to a variety of psychiatric cases and you will be directly involved in the treatment planning of YOUR patients. Here, in addition to your clinical duties, you will have the opportunity to participate in educational conferences, research projects beginning in PGY 1 and the training of other residents and medical students.

You will also spend time in our affiliated outpatient clinic at Psychological Associates of Bethlehem and a FQHC. In those settings, you will gain an appreciation of the multidisciplinary approach by joining our team that consists of psychologists, social workers, nurses and a coordinator and you will be directly involved in providing medication management and/or therapy.

Our program focuses on teaching residents the fundamentals of psychiatry and the pharmacologic and therapeutic management of psychiatric illnesses. With around 170 inpatient adult and older adult beds in the network, you will be exposed to various pathologies, co-morbid medical and neurological illnesses, personality disorders and substance use.

Because excellent patient care involves so much more than writing progress notes, you will learn the best clinical practices to improve outcomes and safety, as well as the importance of psychosocial supports and follow up.

“I work in the best field of medicine, and I now have the honor to help train the next generation of psychiatrists using the skills and knowledge that my mentors gave me. When our graduates leave, they will be passionate physicians who provide the best psychiatric care and who seek to find joy in the art of medicine.”

– *Christine Marchionni, MD, FAPA, Program Director*

Dr. Marchionni completed her medical degree at Sidney Kimmel Medical College and residency and consultation-liaison fellowship at Thomas Jefferson University Hospital. She is an active member of AADPRT, APA and APM. Prior to becoming program director she was involved in medical student education. Currently, she is the GME wellness representative for her department and will continue the advocacy of wellness in the residency. She also developed the growing tele-psychiatry program at St Luke’s.

## Salary & Benefits

St. Luke's Graduate Medical Education offers a competitive salary and benefits package. Residents who have successfully completed the St. Luke's residency program and moved into practice have commented that the cost of living in the Lehigh Valley is lower and they found that they had more buying power than in the larger cities.

To view current salary rates and a list of all benefits, visit: [gme.sluhn.org/office-of-medical-education](http://gme.sluhn.org/office-of-medical-education).

## Research

Scholarly research is an essential component of our program. A lifelong interest in research and scholarly activity is an important skill to cultivate. Research is supported by the program director, the faculty, and St. Luke's Department of Research and Innovation. Essential for success in research are faculty mentors, research support, and the opportunity to develop and learn skills in research including methodology and investigation.

During the first year each resident will meet with a faculty mentor to discuss research interests and career goals. The goal is to connect residents with faculty mentors throughout St. Luke's Network who share common scholarly interests and to be able to learn from their experiences and share in their knowledge. More information on Research and Innovation at St. Luke's can be found at [sluhn.org/research](http://sluhn.org/research).

## Why Choose Us – Top 10 Reasons

1

### **You'll actually take care of your own patients!**

As a thriving residency program in a busy, tertiary care setting, our residents are given responsibility to take the lead in patient care.

2

### **You'll be part of a stable, reputable program!**

With a dedicated full-time director and no resident turnover, our program offers the stability and reputation you want.

3

### **Your training will be well-rounded!**

You will gain experience working in a variety of clinical settings and specialties.

4

### **You learn management and leadership skills!**

Our program values protected learning time. You will also have access to our state-of-the-art technology, equipment and simulation centers.

5

### **You'll be exposed to a challenging, fast-paced hospital setting!**

Working at St. Luke's, you will benefit from a fiscally-sound organization that truly values its residency and fellowship programs.

6

### **You'll work in a vibrant community!**

Learn more about what the Lehigh Valley has to offer on page 11.

7

### **You'll work in a friendly environment!**

Our program is filled with caring compassionate people dedicated to serving their community and to health care professionals.

8

### **You'll have a good work/life balance!**

Our call system promotes fair and reasonable work hours. Time off for vacation is supported.

9

### **You'll work side-by-side with our specialists!**

There is a rich interaction among fellows and attending physicians, specialists and surgeons.

10

### **You'll be in an active, academic learning environment!**

You'll help guide our Temple/St. Luke's medical students, as well as have opportunities for academic growth through clinical research.

## Welcome to... St. Luke's Anderson Campus

Situated on 500+ acres in the vibrant and thriving Lehigh Valley economy, St. Luke's Anderson Campus is one of the nation's newest hospitals – constructed in 2011. Featuring a **XX**-bed acute care hospital, **XX** annual admission emergency room, as well a five-story ambulatory surgery facility constructed in 2017, Anderson Campus offers a unique experience for both patients and physicians alike.

In addition to state-of-the-art technology, hotel-like amenities and services, the campus also features an organic farm where fresh fruits and vegetables are grown for patients and visitors. Walking trails and beautiful water fountains adorn the campus, which is nestled in the foothills of the Delaware River.

But beyond its beautiful views and brand-new units, St. Luke's Anderson Campus offers a culture that is progressive, youthful and fearless. It is poised to grow and thrive for many years to come. A Women's and Babies Pavilion is being added this year, as well as educational space for our residents and future fellows. Come see how St. Luke's is innovating health care!
