## FAMILY MEDICINE

You will become a welcome member of our team in our 17,000 square foot out-patient family practice center. We offer our community a full range of services including obstetrics, nutrition counseling and family counseling. We perform many procedures at our office:

- ❖ Fetal monitoring
- ❖ Fetal ultrasound
- ❖ Flexible sigmoidoscopy
- ❖ Colposcopy
- ❖ Minor surgeries
- ❖ LEEP
- ❖ Exercise stress testing

During your rotation you will have the opportunity to work with our attendings and residents, actively examine patients, present them to our preceptors and formulate an assessment and therapeutic plan. You will see a wide variety of age groups and pathology. This is one of our most highly sought after rotations.

## SURGERY

We offer you the choice of general surgery vs. vascular vs. surgical oncology. Each surgical attending will take you under his wing and provide you an education in pre and post operative management, experience and hands on training in the OR and out-patient surgical follow-up if you so choose.

## FAMILY MEDICINE IN-PATIENT

You will gain great experience and see much pathology on our medicine service, where you will become a functional member of the team. You will be assigned your own patient panel, round on them every day, write progress notes, and actively participate in the daily management. You will also be given reading assignments and presentations at the discretion of your senior resident and attending for the week. There is much to gain from this experience.

## ICU

You will learn all aspects of critical care in our ICU. You will be under direct supervision of our senior resident and our on-site critical care team. Our ICU is a mixed medical, surgical and cardiac unit where you will meet and work with our various sub specialists. You will gain experience and knowledge in intubation, ventilation, cardiac monitoring (including SwanGanz), and hemodialysis. It is a wonderful experience to broaden your medical skills and knowledge base. You will be assigned your own patients to work with and care for.
