- » 38% non-Pennsylvania residents from 18 different states plus the District of Columbia
- » 43% women
- » 17% under-represented in medicine
- » 67% did something between college and medical school

"Attending school in the Lehigh Valley is an enriching experience. As a Temple/St. Luke's student, be prepared to work and, most importantly, serve. We work in a high-volume hospital with an extremely diverse patient population. The community has embraced our presence and we are expected to be heavily involved in patient care. With a smaller student body, we are able to make an immediate impact on the community. Through various service projects and clinic opportunities, we become heavily invested in our patient population."

~ COLIN PATRICK CAVERLY | CLASS OF 2016

Center, MA

» Physical Medicine & Rehabilitation

Temple University Hospital, PA
University of Utah Affiliated Hospitals, UT

» Psychiatry

University of Colorado Medical Center, CO

» Radiology – Diagnostic

University of California – Davis Medical
Center, CA

» Urology

Hershey Medical Center/Penn State, PA
SUNY Health Science Center – Brooklyn, NY

"The St. Luke's campus truly provided me with the best of both worlds – an intimate environment with a strong focus on academics. I had the opportunity to obtain a high quality medical education while being in a supportive community environment. I enjoyed the close relationships I formed with the doctors and my fellow medical students and liked that the majority of my rotations were completed right at St. Luke's. When it was time to decide on where I wanted to be for my residency in General Surgery, staying at St. Luke's quickly became my first choice." ~ BRIAN WERNICK | TEMPLE

MEDICAL SCHOOL CLASS OF 2013 | PGY2,
SURGERY RESIDENT, ST. LUKE'S UNIVERSITY
