Services

St. Luke’s Senior Care Associates bring together a specialty team of geriatricians, advanced practitioners and a social worker for older adults.

We recognize that with age comes unique needs and challenges. We are here to help seniors and caregivers get the most out of life.
Senior Assessment
An assessment can help diagnosis and address problems so that a longer, higher quality of life may be sustained – it is not always easy to recognize when help is needed.

When to Consider an Assessment
• A decline in physical health and/or memory
• Issues with maintaining daily living skills
• An increase in the frequency of falls
• A decline in appearance and hygiene
• Multiple medications
• A change in management of finances

The Assessment Consists of:
• Physical Examination
• Psychological Testing
• Diagnostic Testing
• Care Coordination
• Family Conference

Primary Care for Older Adults
Our board-certified geriatrician and care team specialize in primary care for older adults 65 and over.

Mindstreams
Comprehensive Computerized Cognitive Testing
If you or someone you love is experiencing problems with memory, concentration or language (especially in the short term), St. Luke’s Senior Care Associates has testing available to assist your physician with diagnosing and treating those cognitive problems.

Schedule an Appointment
Most insurance plans and Medicare cover our consultation services.

Caregiver Support Group
A support group for anyone caring for an older adult

St. Luke’s Caregiver Support Group meets monthly at 5:30 pm at:
5445 Lanark Road, Suite 200
Center Valley, PA 18034
