

**St. Luke's Hospital & Health Network**  
**Drug Screening Requirements**

A negative five (5) panel drug screen is required for all student interns, no sooner than 30 days prior to their start date at St. Luke's. Future student interns should speak with their school's program director to identify the process the school arranged for the drug screening to be completed. The drug screening must come from a Health and Human Services approved/certified lab *and be a forensic study*.

Please forward drug screens that do not have a negative result to [Georgina.Winfield@sluhn.org](mailto:Georgina.Winfield@sluhn.org) for review.

If the school does not already have a pre-determined process, the school may develop a contract with St. Luke's for a **5 Panel Immediate Urine Drug Test** to be completed.

**Please ensure these drugs are included in the five panel drug screen:**

- Amphetamines
- Cocaine
- Cannabinoids
- Opiates - Includes morphine, codeine, hydromorphone, hydrocodone (all of these must be included)
- Phencyclidine (PCP)
