

## 2025 Quakertown and Upper Bucks Community Health Needs Assessment Executive Summary

The Community Health Needs Assessment (CHNA) is conducted every three years as part of the Patient Protection and Affordable Care Act. The established priority areas were determined based on CHNA findings and alignment with the social determinants of health, Healthy People 2030 objectives, and the mission and vision of St. Luke's University Health Network.

### Key Findings

Overall Network assessment results highlight three priority focus areas for our community health initiatives:

#### Access to Care

#### Chronic Disease Prevention

#### Mental and Behavioral Health

The priorities established serve as a guide for our health initiatives that support our patients, community health workers, and communities. Findings from the 2025 CHNA highlight the differences within our communities that contribute to the prevalence of disease and poor health outcomes that can lead to a lack of optimal health, especially among socially disadvantaged populations.
