

Welcome to St. Luke's Spine & Pain Associates,

On behalf of our staff and providers, we would like to welcome you. We understand that pain is a daily part of life for many people, and is often undertreated or ignored. We want to assure you that we will take your pain and the impact that it has on your life seriously.

For your benefit, we would like to familiarize you to our service. For each patient, a diagnosis is made and individualized treatment plans are offered. We believe in utilizing a multidisciplinary approach to pain with an emphasis on restoring the patient to the full extent possible.

In order to accomplish this, we utilize many diagnostic and treatment modalities, including, but not limited to; interventional therapy, individualized therapy programs, electro diagnostics and appropriate medications. Surgery will be advised when non-operative care cannot achieve necessary results. We do all of this with the hope of maximizing your pain relief, physical function and quality of life.

We also have office policies in place to protect you and your well-being. At St. Luke's Spine & Pain Associates, we feel that the patient-provider relationship needs to be built on a foundation of mutual trust in order to permit high quality, effective and safe care to our patients.

Here are some common policies that all patients need to be aware of, upon their initial consultation at St. Luke's Spine & Pain Associates.

1. The first visit is a consultation only; no procedures/injections are performed on the first visit, as this time is utilized to thoroughly evaluate your individual needs and coordinate your treatment plan.
2. Medication prescriptions are not given on the first office visit.
3. You will be rescheduled if you are more than 15 minutes late for your appointment as a courtesy to other patients who are on time.

Most importantly you can expect us to listen and validate your specific concerns. We will offer our expert advice and develop customized clinical pathways with a goal of reducing your pain and improving your quality of life. Everything we do is designed with your health and safety in mind. We strive to treat you with the respect, kindness and compassion that you deserve.

We look forward to your visit with us.
